

SUPPLEMENTARY PRIVACY STATEMENT – SPECIAL CATEGORY DATA

1. This privacy statement is to be read in conjunction with the Club's Privacy Notice for the collection and retention of personal data. All of your rights stated in that Notice also apply to data to which this statement refers.
2. Information about your health is termed "Special Category Data" under the Data Protection (Jersey) Law 2018 and we are required to apply measures to that data additional to those that apply to other personal data that we hold. Your explicit consent is required for us to hold data on your health.

What information do we collect?

3. We collect data on your pre-existing medical conditions, current courses of treatment and allergies.

Why do we collect the data?

4. Although accidents are rare, in the unlikely event they occur, we need to provide the Medical Professionals with sufficient information to ensure the correct treatment is applied. We also need to take measures to minimise the possibility of contact with any allergen to which you are susceptible.

Who will receive the data?

5. We will provide the data to medical professionals and only in circumstances where it is required for your personal treatment. This includes medical professionals based outside of Jersey.
6. We do not anticipate travel outside of the UK and EU countries, all of which have data protection legislation equivalent to that of Jersey. Your data will therefore be afforded the same level of protection as it would in Jersey.

How is the data held?

7. The information will be predominantly held in paper record form. This is to ensure that it is immediately available even when electronic communication is not possible. When away from the Club it is held by a nominated Club Official who is personally responsible for its safe custody.

If you require any further information in connection with this policy please email:
